Kevin Waters

Department of Physics, Michigan Technological University
kwaters@mtu.edu
(270)-312-5419

EDUCATION

PHD. PHYSICS August 2013 - Present

Michigan Technological University (MTU)

Advisor : Ravindra Pandey
Expected Graduation Date : August 2018

BACHELOR OF SCIENCE August 2009 - May 2013

Indiana State University (ISU)

Major: Physics
Minors: German, Mathematics
Cum Laude

RESEARCH EXPERIENCE

MICHIGAN TECHNOLOGICAL UNIVERSITY, *Graduate Researcher* June 2013 - Present

- Performed quantum mechanical simulations (density functional theory) on various systems of interest on high performance computing architectures.
- Designed and implemented computational analysis tools using Python.
- Communicated findings through documentation, presentations and publications to academic journals and professional conferences.
- Collaborated on the NASA Ultra-Strong Composites by Computational Design study investigating polymers and nanomaterials.
- Mentored undergraduate, graduate, post-doctoral students and visiting faculty members on research methodologies, utilizing the linux-unix environment, and harnessing high performance computing facilities.

DOE SCIENCE GRADUATE FELLOWSHIP, *Graduate Researcher* January 2018 - June 2018

- Collaborated with Eric Bylaska to implemented novel features into the ab initio computational chemistry package NWChem at the Pacific Northwest Laboratory.
- Derived theoretical framework and obtained results to implement a novel numerical method for a long-ranged exchange operator in a plane-wave setting.
- Prototyped and implemented novel long-ranged exchange operators into the framework of NWChem.
- Performed ab intio molecular dynamics simulations on the nanomaterial and biological interface to gain insight on the chemistry and physics for the next generation of biosensors.

AIR FORCE RESEARCH LABORATORY, *Graduate Researcher* June 2017- August 2017

- Collaborated with Ruth Pachter investigating the potential functionalization of boron-nitride nanomaterials using first principles methods.
- Investigated the effects of defects on the physical and electronic properties of boron-nitride monolayers and nanotubes.
- Analyzed the effects of chirality of boron nitride nanotubes on the electronic and mechanical properties.

RESEARCH EXPERIENCE (CONT.)

INDIANA STATE SUMMER RESEARCH, *Undergraduate Researcher* May 2012 - Aug 2012

- Derived theoretical and experimental methods with Joseph West for moving large pyramid type blocks.
- Developed numerical models using python to modify n-sided (3-n) polygons to decrease work required for rotation.
- Implemented the numerical methods to modify concrete blocks and tracked motion to test models.
- Communicated results in monthly presentations to peers and professors in the summer undergraduate research program.

INDIANA STATE SUMMER RESEARCH, *Undergraduate Researcher* May 2010 - Aug 2011

- Analyzed electrocardiograms (ECGs) with Guo-ping Zhang using Fourier transforms in an attempt to diagnose heart conditions.
- Utilized the university's supercomputer to perform analysis on data obtained from the MIT-BIH Arrhythmia Database.
- Communicated results in monthly presentations to peers and professors in the summer undergraduate research program.
- Presented results at the American Physical Society March Meeting 2013

TEACHING & MENTORING EXPERIENCE

INSTRUCTOR, *Michigan Technological University* Fall 2016, 2017

- Developed the course curriculum for PH4390, Computational Methods in Physics, for senior undergraduates and new graduate students.
- Instructed students on the fundamentals of coding, numerical methods and scientific computing.
- Implemented a laboratory section for the class to create a supervised learning environment for students writing, developing, testing and documenting their programming assignments in a linux-unix environment.

GRADUATE TEACHING ASSISTANT, *Michigan Technological University* Fall 2013 - Fall 2016

- Assisted in class instruction, directed laboratory sections and provided feedback to students ranging from freshman to graduate students.
- Facilitated the following classes: Introduction to Scientific Programming for Physicists, Computational Methods in Physics, Honors Physics I, and Introductory Astronomy.
- Proctored University Physics I and II exams.

PHYSICS LEARNING COACH, *Michigan Technological University* Spring 2015

- Worked with a diverse population of students in group and one-on-one settings.
- Assisted students with concepts and problems for University Physics I and II.

UNDERGRADUATE TEACHING ASSISTANT, *Indiana State University* Fall 2010 - Spring 2013

- Assisted in the instruction of the College and University Physics I and II.
- Aided in the set-up, breakdown and maintenance of the laboratory.

PHYSICS LEARNING CENTER TUTOR, *Indiana State University* Fall 2010 - Spring 2013

- Worked with a diverse population of students in group and one-on-one settings.
- Assisted students with concepts and problems for College and University Physics I and II.

TEACHING & MENTORING EXPERIENCE (CONT.)

ACADEMIC PEER ADVOCATE, *Indiana State University* Fall 2011 - Spring 2012

- Assisted a floor of 40 freshman, organized floor programs, and advised residents on academic issues.
- Mentored first years students during their transition to college.
- Worked the front desk as a customer service representative to answer phone calls, set up meetings, and address needs of residents and staff.

PRESENTATIONS & TALKS

1. **Stability and Electronic Properties of Amine Functionalized Boron Nitride Nanostructures**
   Graduate Research Colloquium (MTU) · February 2017
2. **Amino Acids Interaction with Boron Nitride Nanomaterials**
   American Physical Society March Meeting · March 2016
3. **First Principles Study of Boron Nitride Nanomaterials & Amino Acid Molecules**
   Physics Graduate Colloquium (MTU) · Feb 2016
4. **Ab Initio Study of the Structural and Electronic Properties of MgV_2O_4 in its Cubic Phase**
   Graduate Research Colloquium (MTU) · February 2015
5. **A Theoretical Study of Structural and Electronic Properties of Alkaline-Earth Fluoride Clusters**
   American Physical Society March Meeting · March 2014
6. **Computational Analysis of Electrocardiograms**
   American Physical Society March Meeting · March 2013

CONFERENCES ATTENDED

- **American Physical Society March Meeting** · March 2016
- **Supercomputing** · November 2014
- **American Physical Society March Meeting** · March 2014
- **American Physical Society March Meeting** · March 2013

LEADERSHIP & ENGAGEMENT

- **MTU Graduate Student Government: Department Representative** · 2014-2015
- **Friends of the Van Pelt Library Board Member** · 2016-2017
- **Reviewer for MTU Summer Undergraduate Research Fellowship** · 2016,2017
- **MTU Graduate Student Government: Friends of the Van Pelt Library Liaison** · 2014-2016
- **MTU Graduate Student Government: IT Governance Group Representative** · 2015
- **MTU Summer Graduate School Softball Team Manager** · 2014-Present
- **ISU Society of Physics Students President** · 2012-2013
- **ISU Phi Gamma Delta Academic Chair** · 2012-2013
- **ISU Residential Life Academic Peer Advocate** · 2012-2013

SKILLS & INTERESTS

PROGRAMING LANGUAGES

- Python (5+ years)
- C/C++ (3 years)
- Fortran ($<$ 1 year)
- Matlab/Octave ($<$ 1 year)

ATOMIC SIMULATION SOFTWARE

- Vienna Ab-initio Simulation Package (VASP) (5 years)
- Gaussian09 (5 years)
- NWChem ($<$ 1 year)

OPERATING SYSTEMS

- Linux/Unix
- Mac OS
- Microsoft Windows

AWARDS

- **Department of Energy Science Graduate Fellowship** · 2017
- **John Miles Physics End Fellowship** · 2017
- **Traditions of Giving Fellowship** · 2013
- **Physics Outstanding Graduating Senior** · 2013
- **Outstanding Physics Teaching Assistant** · 2013
- **John McCarthy Outstanding Junior Award** · 2012
- **Boy Scouts of America Eagle Scout** · 2007
